Regulation Compliance Statement

UK REACH and EU REACH

Regulation (EC) 1907/2006

Statement Issue Date: 4th January 2022
Products Covered: All products manufactured by Respirex International unless otherwise notified.
Note: if you require details regarding a specific part number, please contact our Sales Team.

REACH is a regulation of the European Union, adopted to improve the protection of human health and the environment from the risks that can be posed by chemicals, while enhancing the competitiveness of the EU chemicals industry. It also promotes alternative methods for the hazard assessment of substances in order to reduce the number of tests on animals.

REACH, and related EU legislation, has been replicated in the UK with the necessary changes to make it operable in a domestic context. The key principles of the EU REACH Regulation have been retained. This is now in operation and is known as UK REACH.

Respirex International work closely with their suppliers to ensure products meet the requirements of REACH (EU & UK). In most cases this means that products do not contain any of the Substances of Very High Concern (SHVCs) regardless of the 0.1% w/w threshold.

Signed:

Lynn Sinden
Group Quality Manager
